JANUARY 2018 BULLETIN

I wish to take this opportunity to appeal to MBAM members to get yourself updated on the activities of the Association through our various communication channels such as the Master Builders Journals, Bulletins, circulars, website and Facebook page as the information will be useful to members especially on new government policies and developments affecting your organisation and businesses.

INTERVIEW BY JAPANESE INTERNATIONAL COOPERATION AGENCY (JICA)

On 9th January 2018, MBAM and Japan International Cooperation Agency (JICA) held a meeting on the Study on Application of Development Experiences to Third Country Training Programme (TCTP) in Malaysia at Tan Sri Datuk Tee Hock Seng Conference Room.

The meeting was chaired by MBAM President, Mr Foo Chek Lee and co-headed by MBAM Council Member cum Chairman of Safety & Health Committee, Mr Michael Yap, MBAM

Executive Director, Ms Loh Mei Ling, MBAM Assistant General Manager, Mr Lenny Lim, MBAM Manager, Ms Chai Min Fung, MBAM Senior Assistant Manager, Mr Mohd Farhan. Meanwhile, JICA was represented by Mr Eizoh Yamamuro, Dr Jinchiro Yabuta and Ms Lee Yoon Ling.

Third Country Training Programme (TCTP) provides participants from developing countries with technical training in partnership between Malaysia and JICA for the purpose of transferring to or sharing with other developed countries their development experience, knowledge and technology.

MBAM President, Mr Foo Chek Lee and MBAM Chairman of Safety and Health Committee, Mr Michael Yap at the meeting

In view of the training institutes in Malaysia maintaining a great interest in the Japanese experience in the fields concerned, it is relevant to not only Malaysian training institutes but also TCTP participants to share understandings on development process of Japan. The meeting focused on the Development Experiences of MBAM on Occupational Safety and Health and on making qualitative improvement to TCTP through a comparative study of development experiences in Malaysia and Japan.

In conclusion, MBAM is pleased with the outcomes of the meeting and in JICA's initiative to conduct these sessions which will enhance relationship and mutual understanding between two countries via cooperation, its global network, and knowledge on the development cooperation.

HUB (ICPH),
SINGAPORE**

The visit to Building and Construction Authority (BCA) Zero Energy Building (ZEB) and Straits Construction Integrated Construction and Prefabrication Hub (ICPH), Singapore was held on 25th January 2018. MBAM Deputy President & Chairman of International Affairs Committee, Tan Sri Dato' A K Nathan led a 22-Member delegation. MBAM Council Members, Datuk Astaman Abdul Aziz, Mr Wilson Ang and I were among the participants. The purposes of the visit were to enhance members' knowledge on the latest building construction technologies and innovations and also to discover the new innovations in the construction sector with sustainable design, prefabrication and precast to increase productivity and enhance long term sustainability.

TO BUILDING AND
CONSTRUCTION
AUTHORITY (BCA)
ACADEMY & ZERO
ENERGY BUILDING
(ZEB)**

MBAM delegates received warm welcome from Deputy Managing Director, Mr Tan Tian Chong, Director, Dr. Gao Chun Ping and Principal Manager, Built Environment Research and Innovation Institute of BCA, Singapore, Ms Alice Goh. BCA shared knowledge and experiences on the construction of the Zero Energy Building (ZEB), the adoption and implementation of Prefabricated Prefinished Volumetric Construction (PPVC) System in Singapore and how it results in improving construction productivity.

MBAM delegates were briefed that the first Zero Energy Building in South-east Asia located within the BCA Academy, is retrofitted from an existing building and was officially opened on the 26th Oct 2009. It houses green classrooms and offices, and also function as a test-bed centre for Green Building Technologies. The ZEB is a zero energy building because the building produces enough energy to run itself. As a critical test-bed facility, the 4,500 m² building aims to produce enough energy to power the building. In all, the building will save S\$84,000* a year in energy cost compared to typical office in Singapore.

The building aims to achieve this through a combination of green building technology, clever building design that takes advantages of natural ventilation and lighting (this is called 'passive design'), and the harnessing of solar energy.

MBAM delegates toured the ZEB to study the special features of the building with the guidance of BCA team.

TECHNICAL VISIT TO STRAITS CONSTRUCTION INTEGRATED CONSTRUCTION AND PREFABRICATION HUBS (ICPH), SINGAPORE

MBAM delegates also took the opportunity to visit the Greyform building, an integrated construction and pre-fabrication hub (ICPH) by Straits Construction Group on the second half of the day. Straits Construction secured a contract from the Building & Construction Authority in May 2014 to build and operate an Integrated Construction and Prefabrication Hub (ICPH). This new state-of-the-art highly automated plant was launched on 3rd October 2017, and it occupies 2 hectares of industrial land at Kaki Bukit, Singapore.

The plant will have an annual production capacity of more than 60,000 m³ of precast components, much more than what a conventional precast yard can produce with the same

factory space. In addition to precast concrete production, the ICPH will also produce prefabricated bath units (PBU) which Straits Construction will manufacture under a Licensed Agreement with a major Italian PBU producer. Greyform ICPHs has a multi-storey advanced manufacturing facility to produce prefabricated construction elements, with a high degree of mechanisation and/or automation. Activities in ICPHs include:-

- Concrete batching facility with a flying bucket concrete delivery system to feed concrete to various precast production lines;
- Steel reinforcement fabrication facility with the ability to produce customized reinforcement products such as engineered mesh, stirrup cages, etc., to support its various precast production lines;
- Pallet Circulation Plant provides high flexibility and precision, enabling the production of 2D components without utilizing fixed moulds;
- Fully finished, lightweight PBU solutions for the modern construction industry;
- 2.4m wide Slipformer and complementary equipment for the production of various width pre-stress elements;
- Comprehensive software system for production planning and efficient control of precast automation machinery.

MBAM Deputy President, Tan Sri Dato' A K Nathan together with the other Council Members presented a token of appreciation to the Business Development Manager of Greyform Pte Ltd, Ms Jaime Lee for giving this opportunity to MBAM to visit the Greyform Building. MBAM delegates were kept updated with the technologies and knowledge through this informative and interactive visit.

We are very fortunate to have the opportunity to visit the Integrated Construction and Prefabrication Hub (ICPH). Overall, it was an interesting and informative visit.
