MBAM – CIDB JOINT COLLABORATION ON QCLASSIC AWARENESS AND ASSESSOR TRAINING

2nd - 4th April 2018 (Monday - Wednesday)
MBAM Training Centre

2, Jalan 1/109e, Taman Desa Business Park, 58100 Kuala Lumpur

INTRODUCTION & OBJECTIVES

Quality Assessment System in Construction (QCLASSIC) is a system or method to measure and evaluate the workmanship quality of a building construction work based on Construction Industry Standard (CIS 7:2014). QCLASSIC enables the quality of workmanship between construction projects to be objectively compared through a scoring system.

CIDB Malaysia is collaborating with MBAM to conduct the QCLASSIC Awareness & Assessor (Stage 1 & 2) Training with the aim to produce qualified QCLASSIC Assessors for the industry.

QCLASSIC Objectives

- ✓ To benchmark the quality of workmanship of the construction industry.
- ✓ To establish a standard quality assessment system on quality of workmanship of construction work.
- ✓ To assess the quality of workmanship of a construction project based on the relevant approved standard.
- ✓ To be used as a criterion to evaluate the performance of contractors based on quality of workmanship.
- ✓ To compile data for statistical analysis.

QCLASSIC Scope

QCLASSIC sets out the standard on quality of workmanship for various construction elements of building construction work. The quality of workmanship of a construction work is assessed according to the requirements of the standard i.e., Construction Industry Standard (CIS 7:2014). Marks are awarded if the workmanship complies with the standard. These marks are then summed up to calculate the QCLASSIC Score (%) for a building construction project.

QCLASSIC assessments are carried out through site inspection and use the principles of first time inspection. Construction works that are rectified after an assessment will not be re-assessed. The objective of this principle is to encourage the contractor to "Do Things Right the First Time and Every Time".

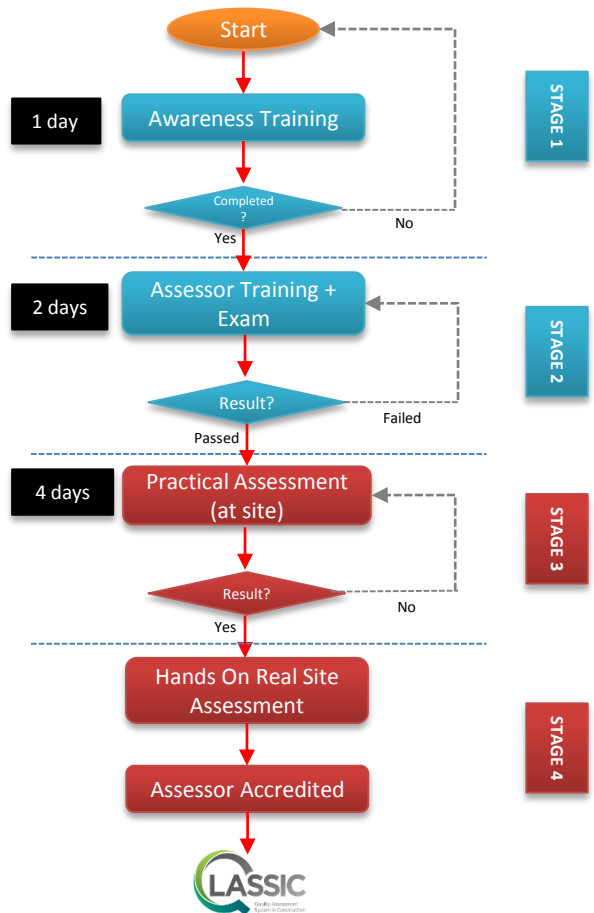

WHO SHOULD ATTEND

Contractors, Developers, Project Director, Project Manager, Project Engineer, QS, QA & QC Supervisor, Site Engineer, Architects, Foreman, Site Supervisors etc. **[G7 Contractors]**
