MASTER BUILDERS ASSOCIATION MALAYSIA
| Maybank : 014 114 430 810

DAY 2

Workshop on OSHCIM-Accident Prevention by the Industry for the Industry

Managing occupational safety and health risks at the planning and design stage is often more effective, easier to sustain and cheaper to do than making changes later when the hazards become real risks in the workplace. The introduction of the Guidelines on Occupational Safety and Health in Construction Industry (Management) (OSHCIM) by DOSH in 2017 introduced sharing responsibilities among all stakeholders in the industry's supply chain which includes client, designer and contractors.

HIGHLIGHTS

- Understand OSHCIM requirement and it's implication towards the construction industry in Malaysia
- To provide better understanding of roles and responsibility for clients, designers and contractors in OSHCIM Guideline.
- To expose on concept of OSHCIM and overall risk management in construction project design lifecycle
- Let's join the Workshop, and together we strive towards reducing accidents in the construction industry in Malaysia
