STUDY VISIT TO HOSPITAL KAPAR

Date: 19 Sep 2025 (Friday) | Time: 9.00am - 1.00pm

Venue: Hospital Kapar Selangor
42200 Kapar, Selangor

Join us for an insightful study visit to Hospital Kapar, organized by the Master Builders Association Malaysia (MBAM). This visit offers a valuable opportunity for industry players and professionals in the Construction and Mechanical & Electrical (M&E) field to explore how engineering systems are integrated into a modern healthcare facility.

Hospital Kapar is a critical public healthcare development located in Bandar Bukit Raja, Selangor, currently under construction by IJM Construction, in joint venture with Ganda Imbuan Sdn Bhd, as part of a Design & Build initiative commissioned by the Ministry of Health. The project comprises a 7-storey, 312-bed hospital, an 11-storey staff quarters, mortuary, sewage treatment plant, and guardhouse. With a contract value of RM831 million, construction began in November 2022 and is currently 39% complete, with expected completion in November 2026.

During the MBAM visit, participants will receive a guided tour of key hospital facilities and building systems, accompanied by a presentation from the project's technical and planning team. The briefing will cover on the overall construction of the hospital including critical M&E-related aspects such as energy efficiency, building automation, medical gas systems, HVAC, water and waste management, and smart hospital features. A Q&A session will follow, offering deeper technical insights and a chance to network with peers and industry professionals.

Don't miss this opportunity to witness how M&E systems contribute to the development of efficient, safe, and sustainable healthcare environments at Hospital Kapar
