

MALAYSIA INTERNATIONAL CONSTRUCTION &  
INFRASTRUCTURE TECHNOLOGY EXHIBITION

[FOR IMMEDIATE RELEASE]

*Experience the latest in construction machinery & equipment showcase at MBAM OneBuild 2026 .*

## **MBAM ONEBUILD 2026 TO CONNECT CONTRACTORS WITH THE LATEST CONSTRUCTION TECHNOLOGIES AND SOLUTIONS**

**KUALA LUMPUR, 14 May 2026:** The Malaysian construction and infrastructure industry will once again take centre stage as **MBAM OneBuild 2026** returns for its 12th edition from **5 to 7 August 2026** at the **Kuala Lumpur Convention Centre, Malaysia**.

This year, MBAM OneBuild will be held alongside OneWare, the 5th edition of the Malaysia International Hardware Technology Exhibition. The event is expected to draw more than **250** exhibitors across **400** exhibiting booths and attract approximately **10,000** trade visitors from **25** countries and regions. The exhibition will present a powerful cross-sector platform connecting the full ecosystem of construction, infrastructure, hardware, machinery, engineering technologies, and smart urban development solutions.

Organised under the theme “**Smart Cities Building Tomorrow**,” the exhibition reflects the rapid transformation of Southeast Asia's built environment industry, where digitalisation, sustainability, industrialisation, and smart infrastructure are reshaping the future of construction.

MBAM OneBuild 2026 will present **six** dedicated exhibition segments encompassing **Construction, Infrastructure, Construction Machinery & Equipment, Smart City, and Digitalisation**. The exhibition will place strong emphasis on advanced digital construction technologies, including Building Information Modelling (BIM), IoT-enabled infrastructure, energy-efficient and green building solutions, as well as intelligent mobility systems, reflecting the future direction of sustainable construction and smart urban development.

One of the highlights of the exhibition will be **Digital Construction Day**, a dedicated programme and exhibition zone organised in strategic partnership with CIDB Digital, the digital arm of the Construction Industry Development Board (CIDB). The initiative will spotlight emerging digital solutions and smart construction practices, including BIM, IoT-enabled systems, digital project management, IBS technologies, and sustainable construction approaches. Through industry-focused knowledge sharing sessions and technology showcases, the programme aims to encourage collaboration between technology providers, contractors, consultants, developers, and project stakeholders driving the industry's digital evolution.

Participating companies will have the opportunity to showcase technologies and innovations directly to key industry stakeholders, strengthen brand visibility within Malaysia's construction ecosystem, generate high-value business leads, establish strategic partnerships, and expand market access across the ASEAN region.

Another key attraction will be BuildTalk, a three-day seminar series bringing together leading industry experts to discuss the future of industrialisation, digital construction, infrastructure modernisation, ESG integration, and sustainable urban development. The seminar is expected to address some of the industry's most pressing priorities, including productivity enhancement, workforce transformation, carbon reduction, and resilient infrastructure planning.

*Live demonstrations and hands-on technology showcases provide contractors and industry professionals with practical insights into modern construction solutions.*

The exhibition will also feature the Concrete Clinic, where visitors can experience live demonstrations of the latest breakthroughs in concrete technology and sustainable materials.

In addition, the Master Builders Association Malaysia will host a dedicated ESG conference addressing sustainability strategies, governance frameworks, environmental responsibility, and long-term resilience within the construction and infrastructure sectors.

Beyond technology and conferences, MBAM OneBuild 2026 will deliver extensive business networking opportunities through hosted networking sessions, contractor engagement activities, supplier matching initiatives, machinery showcases, and product demonstrations. Contractors, developers, and procurement teams will be able to compare products and brands directly, discuss pricing and procurement strategies with suppliers, explore alternative solutions for cost optimisation, and identify technologies capable of improving operational efficiency and project performance.

MBAM OneBuild 2026 is organised by MBAM OneBuild Sdn Bhd, a subsidiary of the Master Builders Association Malaysia, and is endorsed by the Ministry of Works, Ministry of Housing and Local Government (KPKT) and the Malaysia External Trade Development Corporation (MATRADE). The event is supported by the Malaysia Convention & Exhibition Bureau (MyCEB), the Construction Industry Development Board (CIDB), and more than 40 trade associations.
