Dear Sir/Madam,

ACF CONFERENCE - TRANSFORMING CONSTRUCTION THROUGH AI, DIGITALISATION AND SMART TECHNOLOGIES

The construction industry is entering a new era driven by Artificial Intelligence (AI), digitalisation, automation, and smart technologies. As the sector faces increasing pressure to improve productivity, enhance project delivery, strengthen safety performance, and achieve sustainability goals, digital transformation has become a critical enabler of growth and competitiveness. Technologies such as AI-powered analytics, Building Information Modelling (BIM), digital construction platforms, drones, robotics, and data-driven project management are revolutionising the way projects are planned, designed, constructed, and managed throughout their lifecycle.

This conference provides a platform for industry leaders, policymakers, technology providers, and construction professionals to explore emerging innovations and their practical applications within the construction sector. Through presentations, industry case studies, and knowledge-sharing sessions, participants will gain valuable insights into the opportunities and challenges of adopting digital technologies. The conference aims to foster collaboration, encourage innovation, and support the industry's transition towards a smarter, more connected, and sustainable future in line with Malaysia's construction transformation agenda and the global advancement of Construction 4.0.
